## Here's How You Benefit

- Provides merchandise loss security, prevents theft saving merchandise replacement cost.
- 

- Lower maintenance cost.
  - Much less expensive than electric operated rolling grilles and other sliding grilles.
- 

- Saves time and labor.
  - Fits opening exactly ensures smoother operation.
  - It will last longer, will not wear or require costly repair, saving money.
  - Easy to close and lock for effective burglary deterrence while allowing merchandise visibility.
  - Reduces loss, replacement, and insurance costs.
  - Easy to operate.
- 

- For quiet and easy operation.
- 

- Unlimited flexibility to satisfy your specific requirement - larger openings, smaller openings, dock gates, etc.
- 

- High custom appearance and image to coordinate with store decor.
  - Attractive look.
  - Gives business pleasant appearance to customer.
  - Gives decorative appearance instead of cold security look.
- 

- Protects against water, salt, and corrosive elements, giving the closure a longer life saving money by not having to replace because of rust, corrosion, etc.
- 

- With aluminum I-beam track you are able to negotiate radius terms due to irregular editor layout or store front designs.
  - Adapts to many applications: mall front, store within a store, behind glass, food courts, industrial, commercial, and institutional applications, parking garages, warehouses, and dock gates.
  - Ability to mount in or behind the opening, side slide or bi-part opening, locking channels keyed alike and/or steel drop bolts with floor strikes.
- 

- Expensive, strong overhead track is not required allowing minimal installation costs, saving money.
  - Light weight allows employees to open and close closure with minimum effort reducing possibility of injuries, resulting in compensation claims and higher insurance premiums.
  - Costs less to ship.
- 

- Strong chain material keeps areas secure and allows product visibility.
  - Little or no maintenance costs.
  - Not easily damaged.
- 

- Will install easily in store fronts without heavy header construction.
- 

- Easy to use.
- 

- Reusable during store hours and doesn't impede with store merchandise.
- 

- Shortens down time waiting for parts.
- 

- Quick delivery - within three or four weeks.
- Low freight costs.
- Emergency orders within days.
